ALLERGENS

CONTAINS: MILK, WHEAT
MAY CONTAIN EGGS AND SOY

DERIVED FROM BIOENGINEERING

TIPS & HANDLING

1. Keep product frozen at 0°F (-18°C) or below until ready to use. 2. 18-24 hours prior to baking, remove desired number of dough sheets from the freezer. 3. Place 1 dough sheet on a sheet pan. Include the non-stick parchment provided in the case under that sheet of dough (no need to oil or spray the parchment). 3a. Repeat this process for the required number of pizzas, stacking up to 5 high on a single sheet pan. 4. Cover sheet pans with plastic. Dough must be completely covered to prevent drying. Store in the refrigerator for at least 18-24 hours, or up to 120 hours (5 days). 5. After dough has thawed, dock the dough if desired prior to baking. Carefully docking dough helps to minimize bubbling. 6. Transfer dough to oiled pizza screens or pans. 7. Top pizza as desired. 8. Bake as follows: IMPINGER/CONVEYOR OVEN: 500°-525°F (260-274°C) for 4.5-6.5 min CONVECTION OVEN: 375°-400°F (191-204°C) for 9-11 min DECK OVEN: 375°-400°F (204°C) for 8-11 min. WOOD BURNING OVEN: 700°-900°F (371-482°C) for 1-3 min., rotating regularly *Ovens vary, so use our suggested guidelines and then optimize time and temperature for your operation. 9. Allow pizza to cool for 3-4 minutes before cutting and serving.
